Converging Process Control and IT Networking

ProView Makes Changes

Advantech ProView Ethernet Switch is a SCADA manageable switches which are the convergence switches for process control and IT networking management. The ProView range of switches uses Modbus/TCP to communicate with the SCADA software and SNMP to communicate with the NMS (Networking Management System) at the same time, thereby allowing full read control over the devices either for control engineers or for IT.

Key Features of ProView Series Industrial Ethernet Switch

Smart features make “Easy Troubleshooting”

- Front LED indicators
- Power failure alarm
- Loop Detection mechanism

Port-based QoS Deterministic Ethernet off-the-shelf

- The Proview “VIP” port prioritizes time-intensive network demands such as Video streaming and I/O control packets.

- 10/100Mbps
- Gigabit Ethernet
- Loop Detection
- Jumbo Frame: 9,216 Byte

Dual Power Inputs (8.4 to 52.8 V_{DC})

- Protective current Overload
- Power Fail Alarm

Industrial Reliability Commitment

- IP30 design (Metal chassis)
- Operating Temp: -40 to 75°C*
- EMC Level3 resistance
- Industrial Certification: CE/FCC/UL508/C1D2/ATEX

IEEE802.3az, Energy Efficient Ethernet

- Saving up to 60%-Off power consumption

Measurement System

ProView Ethernet switches offer the deterministic Ethernet to ensure the high priority data transmission in critical vision inspection. The safety controller can connect with VIP port to get the high priority than other ports.

Food Package Machinery

ProView Ethernet switches offer the "Real-Time" networking status for monitoring and management by SCADA system, also converge of Control Networking with IT Networking
