Apex Dynamics USA Releases the “Micro” Precision Class - Zero Backlash

Apex Dynamics has released a Zero Backlash precision class (Micro Precision) to compliment the standard (5 arc-min) and low backlash (3 arc-min) offerings. Available in seven sizes in both the AB and AF inline helical series, from 42mm through 220mm and is offered in every single stage ratio (3,4,5,6,7,8,9 & 10:1)

Our Patented design (Patent # 6,503,168) enables the integration of the input hub pinion bearing to be placed directly into the rear of the single piece stainless steel planetary cage providing 100% concentricity of all rotating components. All components are manufactured to DIN 4 specifications, which guarantees the backlash specification for over 5 years. All precision helical products are tested dry to ensure compliance and are then labeled with our laser-etched label in the stainless steel housing.

The Most Productive Helical Planetary Gearhead Manufacturer in the World!
