

# F3SG-SR/PG Series

Safety Light Curtain/Safety Multi-Light Beam

## Redefining safety at manufacturing sites

We developed our F3SG-SR/PG Series light curtain to help manufacturers overcome the challenges of globalization and flexible production. This series offers a complete lineup of products that comply with global safety standards and provide a wide range of functionality across all design and maintenance needs, enabling manufacturers to construct state-of-the-art safety systems.

## Safety Light Curtain F3SG-SR

### Finger Protection

Beam gap	10 mm	Detection capability 14-mm dia.
Protective height	160 to 2,000 mm	
Max. operating range Min./Typ.	10 m / 15 m	

IP69K model available

### Hand Protection

Beam gap	20 mm	Detection capability 25-mm dia.
Protective height	160 to 2,480 mm	
Max. operating range Min./Typ.	20 m / 30 m	

IP69K model available

### Arm/Leg Protection

Beam gap	40 mm	Detection capability 45-mm dia.
Protective height	240 to 1,520 mm	
Max. operating range Min./Typ.	20 m / 30 m	

### Body Protection

Beam gap	80 mm	Detection capability 85-mm dia.
Protective height	280 to 920 mm	
Max. operating range Min./Typ.	20 m / 30 m	

## Common accessories including cables and brackets

The light curtains share optional accessories for easy design and retrofitting production lines.

## Omron's unique compact design

The F3SG-SR Safety Light Curtain and F3SG-PG Safety Multi-Light Beam share the same compact housing, making the mechanical design more flexible.

\* Compared with OMRON Robotics and Safety Technologies, Inc's PA46 Perimeter Access Guarding Device. (Based on Omron investigation in June 2018)

## Easy line layout changes

Simply replace a light curtain using the same accessories because the F3SG-SR Series and F3SG-PG Series share the same housing. There is no need to install different accessories for the new light curtain.

Example : In order to secure a larger working space by installing the light curtain closer to the machine, the perimeter guarding model is replaced with the finger protection model

Just replace the light curtain with the same protective height\*

# Flexible design to fit your equipment

## Perfect fit

Protective heights are available in increments of 40 mm up to 1,000 mm\*. The perfect protective height for any area ensures safety and eliminates the need for additional protective measures.

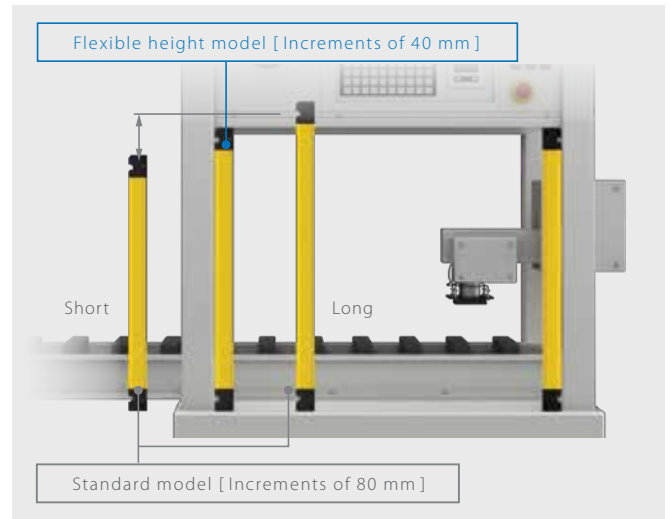

### Problem

The light curtain does not completely fit the protected area and requires additional measures (e.g., adding extra guarding).

### F3SG-SR\*

The flexible height model requires no additional guarding saving installation time and money.

\* F3SG-SR Finger and Hand Protection models only.

## No dead space\*

The F3SG-SR Series eliminates dead space even when light curtains are series-connected or U-shape connected.

### Problem

Dead space exists at the joint.

### F3SG-SR\*

Eliminates dead space and ensures safety.

\* Except for F3SG-SR Finger Protection models.

## Reduce wiring for a flexible design

The F3SG-PG-C Perimeter Guarding Passive Mirror requires wiring only the emitter/receiver. The use of mirror columns allows for protection around perimeter of equipment, without wiring multiple locations. This saves design and wiring time.

### Wiring only the emitter/receiver

### Wiring at one location for full equipment perimeter protection

## Two different synchronization systems

Choose from two different methods of synchronization between the emitter and receiver to suit your equipment.

### Optical synchronization

No sync lines are required. Connect only emitter to power supply.  
Mutual interference prevention :  
Up to 2 sets

### Wired synchronization

Mutual interference prevention:  
Up to 3 sets

# Quick and easy beam adjustment

Color indication of beam status simplifies adjustment and saves time

Area Beam Indicator (ABI) for an at-a-glance check of beam status

Patent pending

ON/OFF status of the light curtain plus low light intensity indicators provide immediate beam status and aid in long distance alignment.

Easy to see

Stable state  
Green :  
Safety outputs ON  
The beams are unblocked.

Low light intensity  
Orange :  
Safety outputs ON  
Adjust beams or check if the light curtain is dirty.

Beams blocked  
Red :  
Safety outputs OFF\*  
The beams in the area are blocked.

\* The indicator of an unblocked area is OFF.

The images of indicator illumination may vary somewhat from the actual products.

Laser Alignment Pointer  
F39-PTG

Assists with beam adjustment. Easy-to-see laser beam shows the sensor orientation.

# Easy installation and angle adjustment

Multiple accessory options to reduce installation time. Simplify angle adjustment without relying on advanced engineering expertise.

Reduce installation time and easily adjust beams after installation without relying on the expertise of experienced engineers.

## Easy beam adjustment

### Problem

When using a protective cover, it is difficult to adjust the beams after installation, and the protection cover is attached.

### F3SG-SR/PG

The rugged metal housing of the light curtain does not need a protection cover. Beams can be adjusted using optional brackets.

Adjustable Top / Bottom Bracket  
F3SJ, F3SN Adapter  
F39-LSGTB-SJ

This bracket used at the top and bottom of the light curtain provides horizontal adjustment of  $\pm 22.5^\circ$ .

Adjustable Side-Mount Bracket  
(Intermediate Bracket)  
F39-LSGA

This bracket provides horizontal adjustment of  $\pm 15^\circ$  as well as vertical position adjustment.

Floor Mount Column  
F39-ST

This column can be installed independently of equipment or fences.

Mount-Column  
Adjustable Base  
F39-STB

(The mount-column adjustable base is sold separately.)

Intelligent Tap  
F39-SGIT-IL3

Settings can be duplicated between the same light curtain models without needing a PC, reducing installation time and effort. Backed up settings are automatically restored when powered on.

# Reduction in wiring minimizes installation costs

## Simple wiring around large equipment

### Problem

Long wire runs can be problematic and costly.

### F3SG-SR/PG

The reduced wiring system lessens the number of cables and terminal blocks as well as wiring time.

### Reduced wiring connector

Y-Joint Plug /  
Socket Connector  
F39-GCNY2

### Emitter Receiver

13-pair terminals

### Reduced wiring

### Emitter Receiver

8-pair terminals

Saving wiring and  
space

Up to  
100m

## One cable connection to control panel

Options provide simple wiring for muting.

### Problem

Light curtains are often used with muting sensors, complicating the wiring in control panel.

### F3SG-SR/PG

Options to reduce wiring simplify the installation of muting sensors.

### Muting Sensor Mounting Arm Brackets F39-FMA

The muting sensor arm mounter facilitates installation of a muting sensor.

### Muting Sensor Connection Box F39-GCN5

The connection box simplifies wiring for muting, and only one cable is run to the control panel.

Note : The E3Z Muting Sensor is sold separately.

# Robust design ensures stable operation in any environment

Light curtains tend to malfunction in harsh environments

Cold storage warehouse

Safety measures cannot be implemented because light curtains cannot operate at such low temperatures.

Metal working process

Oil mist penetrates the light curtain causing a failure.

Food processing line

Cleaning solution that gets inside the light curtain during machine wash-down causes failure.

Harsh environment use

The spattered or dusty optical surface of the light curtain causes a malfunction or an unplanned machine stop.

Use in temperatures down to -30°C

Waterproof, oil resistance  
IP65/IP67  
IP67G

Tightly sealed structure improves environmental resistance

The unique housing structure firmly compresses the optical surface, ensuring a leak proof seal, which improves the environmental resistance of the housing.

Patent pending

Technology 1 to tightly seal the cap

Technology 2 to tightly seal the housing

IP69K model for high-pressure washdown applications

F3SG-SR-K

Waterproof  
IP69K

High-power optical system provides stable detection

The maximum operating range of the F3SG-SR Safety Light Curtain is 20 m and of the F3SG-PG Safety Multi-Light Beam 70 m.

Metal housing increases ruggedness

Laser-marked information withstands harsh environments

# Straightforward Maintenance

Color indicators provide clear error diagnosis

The light curtain status can be checked at a glance.

## Status indicator

Clear LED indicators with labels help perform predictive maintenance by dirt detection and determine the optimal replacement timing.

Colors and patterns indicate the status

Status indicator *	Color	Status
	Red/ Illuminated	LOCKOUT state due to a recoverable error
	Red/ Blinking	LOCKOUT state due to a replacement-recommended error
	Orange/ Illuminated	Safety outputs are instantaneously turned OFF due to ambient light, vibration, or noise
	Orange/ Blinking	The Intelligent Tap is in LOCKOUT state

\* The status indicator is used for the 14-mm detection capability model.

## Lamp

Output status can be checked at a glance.  
F39-SGLP

Output information can be assigned to the lamp and ABL.

Status, such as light intensity drop, can be checked from a distance.

## Back up and restore settings with Intelligent Tap

Replacement and setting time during maintenance can be reduced by 90%\*.

## Plug & Play for quick replacement

Install the Intelligent Tap to automatically copy the settings of the replaced light curtain to a new one. Anyone can easily replace light curtains and immediately restart the machine.

Replacement and setting time reduced by 90%\*

Intelligent Tap  
F39-SGIT-IL3

\* Based on an Omron investigation in June 2018.

# IO-Link facilitates detailed data monitoring

## Status visualization

Various devices can be connected via IO-Link.\*<sup>1</sup>  
 For example, low light intensity due to dirt on the light curtain can be displayed on the monitor, enhancing preventative maintenance prior to an erroneous detection.

### Manually loaded machining : PSDI

PSDI\*, provided as standard, reduces operator effort and increases productivity

There is no need for the operator to press a two-hand control switch, saving operating time and increasing operating efficiency.

### Single break

The machine restarts when the light curtain is interrupted and reset once.

Example : Manual loading and automatic unloading press

### Double break

The machine restarts when the interruption and reset are repeated twice.

Example : Manual loading and manual unloading press

\* PSDI : Presence Sensing Device Initiation

Read the User's Manual (Cat. No. Z405) before using.

Note: Comply with laws and regulations in the countries where the machine operates.

### Dangerous restart prevention : Pre-Reset

The Pre-Reset function prevents possible accidents

This function prevents the restart of equipment while an unseen worker is still near the robot, ensuring operators' safety.

- 1 Press the pre-reset switch inside the hazardous zone.
- ↓
- 2 Get out of the hazardous zone.
- ↓
- 3 Press the reset switch in the control panel to restart the light curtain.  
The machine is ready for restart.

The equipment cannot be restarted until the pre-reset switch of the light curtain is pressed and the light curtain is reset.

## Ignoring interrupted beams : Reduced Resolution

Reduced Resolution changes the detection capability of the light curtain

Even when objects (with a size of 1 to 3 interrupted beams) are present this function ignores them and keeps the safety outputs ON. This helps maintain productivity.

### Example : Arm and body protection

Safety output is kept ON even if worker's finger and an object interrupt 2 beams because they are allowed to enter.

When worker's arm or body, which interrupts 3 beams is detected, safety output is turned OFF.

Note : Ensure that the desired safety distance is maintained.
