

OMRON

Your Machine, Your Image

Unique laser-etched backlit logo conveys style, precision and reliability.

Works great, looks great.

Modern Machine-builders are design-conscious, yet they need precise dialogue between operators and machines. Our Industrial multi-touch technology enables a natural user experience and excellent functionality. The monitor and PanelPC are designed to be seamlessly integrated without compromising the overall machine design.

Your own logo is a brand signature, conveying performance and professionalism.

quantities

Three simple steps to get your logo

It is easy to create an individual design for your monitor. When the design is ready and validated by you, it can be re-used each time you order a monitor or a panelPC.

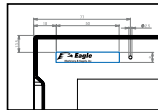

1

Provide your logo

Your contact person can provide you the criteria and template file (Vector based EPS file)

2

Confirmation of right positioning and logo

Our production laser will create a sample in a PDF file. This sample needs to be confirmed by you.

3

Get it done

Your logo will be laser-etched during production

OMRON

Backlighting laser logo

The LED backlight provides a stylish appearance of your brand

Choose your backlight color

It arrives white, feel free to change the color via the monitor software utility

Dimmable 200 steps

Choose your own preferred intensity via the monitor software utility
