

# NEED TO MOVE IT?

Introducing Motoman's **NEW** MPK2, MPK50 and MPL-series robots for your complete packaging automation needs!

## PICK! MPK2

- 2 kg payload, 5-axis picking robot
- High-speed; up to 133 cycles\* per minute
- Designed for caustic solution washdown (IP67)
- USDA certifiable for primary food handling
- Internally routed utilities management package
- High-speed conveyor tracking, vision and picking software

## PACK! MPK50

- 50 kg payload, 4-axis case packing robot
- High-speed; up to 55 cycles\* per minute
- IP54-rated arm; IP67-rated wrist; optional IP65-rated body
- Internally routed utilities management package
- Designed for packing, but flexible enough for picking and short load palletizing

## PALLETIZE! MPL-Series

- 80-800 kg payload, 4-axis palletizing robots
- Up to 27 cycles\* per minute
- Trailer height loads (for most applications)
- Internally routed utilities management package
- Optional on-pendant pattern generation software (EasyPallet™ Pendant)

## Make The Right Move...
