OUR EXPERIENCE BECOMES YOURS

OUR EXPERIENCE IN DIVERSE INDUSTRIES DELIVERS UNIQUE PERSPECTIVES AND FRESH AUTOMATION SOLUTIONS.

YOUR RECIPE FOR SUCCESS!

Performance focused products.

Value added by our seasoned integration partners.

Our global footprint.

CONTROL PLATFORMS

FS100 CONTROLLER

Small, powerful and open. Ideal for packaging, handling and assembly applications. Open software architecture enables OEMs, machine builders and system integrators to develop customized software solutions. Designed for Motoman® robots with payloads up to 20 kg.

MLX100 ROBOT GATEWAY

Unified control architecture for robot control, motion control, logic and communications. Robots are programmed directly from RSLogix™ software environment with Add On Instructions (AOIs).

DX100 CONTROLLER

Robust PC architecture provides system-level control for robotic workcells. Patented multiple robot control (up to 8 robots/72 axes). Fast processing speed provides smooth interpolation.
